EXPERIENCE

Marketfuel

Senior Full-Stack Web Engineer • April, 2024 — October, 2025

- Led third-party integrations architecture across backend services and React interfaces for a SaaS e-commerce platform used by marketing agencies
- Built features end-to-end across React and Ruby on Rails, including idempotent Rails APIs consumed by the frontend
- Helped scale and modernize the platform for multi-tenancy while strengthening SOC 2-aligned security, dependency management, and compliance readiness
- Reduced automated test suite runtime by 80% through improved test coverage and CI pipeline automation
- Lowered AWS costs by 32% by monitoring, deploying, and tuning services for better scale efficiency
- Used Sidekiq to build background processing and automation workflows that improved response times and reduced server load

Mediaocean / Flashtalking

Director, Feeds Automation & Engineering • Feb, 2023 — Sept, 2023

- Led technical direction and engineering best practices for a global team building feed-driven automation and dynamic creative systems across PHP, Docker, and AWS
- Reviewed pull requests, coordinated releases, and led software deployments using Git, Bitbucket, and Jenkins
- Developed reusable internal and client-facing tools, including wrappers around internal APIs that streamlined delivery workflows
- Ran code and documentation reviews that improved alignment, maintainability, and shared ownership across projects
- Managed technical delivery for display, social, and dynamic video campaigns

Senior Web Services Engineer • May, 2015 — Feb, 2023

- Built and operated high-availability services and applications that supported billions of ad requests across the web
- Developed automated data ingestion and transformation pipelines for client APIs and product catalogs, powering scalable services used in ad serving
- Served as lead engineer for feeds, retargeting, social ad creation, and dynamic video automation across hundreds of campaigns
- Delivered solutions for major enterprise brands across automotive, travel, and retail, including Lexus, Audi, Nissan, American Airlines, JetBlue, Royal Caribbean, Best Buy, and Dell

Theatermania

Full-Stack Web Developer • May, 2013 — November, 2014

- Full-stack developer for Theatermania.com and WhatsOnStage.com websites
- Developed and maintained custom CMS for high-traffic sites specializing in theater news, reviews and ticketing
- Created custom WYSIWYG article editor for writers
- Implemented new responsive front-end design

Inkwell Global Marketing

Full-Stack Web Developer • Jun, 2010 — March, 2013

- Lead full-stack developer creating branded internal stores for businesses
- Developed and designed internal store websites for brands such as ADP, Grant Thornton, NYU
- Leveraged E-Commerce platforms such as Opencart and Shopify while developing other sites from scratch
- Developed OpenCart modules to add custom functionality
- Created custom payment gateway flows (PayPal, employee discount programs, etc) and user authentication systems while adhering to PCI compliance rules

SKILLS

Languages & Frameworks

TypeScript / JavaScript, Node.js, React, Ruby / Ruby on Rails, PHP, Python, .NET, HTML, CSS, Tailwind

Cloud, Data & Infrastructure

AWS (EC2, ECS, S3, CloudFront), Docker, PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Sidekiq

Architecture, Delivery & Quality

REST APIs, microservices, ETL and data pipelines, background jobs, CI/CD, Git / GitHub, RSpec, Cypress, Playwright, CloudWatch, Grafana, Sentry

AI & Automation

OpenAI and Anthropic API integrations, LLM and agentic workflows, MCP integrations, prompt engineering, model evaluation, workflow automation, content moderation, NLP

EDUCATION

Stockton University

Bachelor of Arts in English and New Media Studies • 2010

Recipient of New Media Studies Award for social app "Treefingers"

PROJECTS

Make a Mile

Founder, Developer • 2026 — Present

Trip planning, tracking, and blogging platform built in React with the Google Maps API, allowing travelers to plan routes and track actual progress during a trip.

newsquick.app

Founder, Developer • 2025 — Present

AI-powered news aggregation product across iOS and web using LLM-driven summarization, content grouping, and workflow automation.

deadreader.com

Founder, Writer • 2022 — Present

A personal blog about horror literature, including reviews and personal writing.
